# Auditing robots.txt coverage

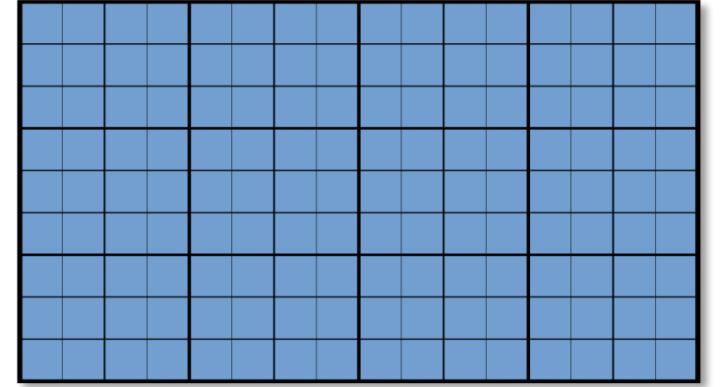

**Trainer:**

Mark Williams-Cook  
Candour

# Key concept

Search engines should have access to all resources that are required to render the page correctly.

# Challenge

Run a crawl of your site or load an existing crawl with both Screaming Frog and Sitebulb and inspect pages and resources that are blocked by robots.txt.

# Challenge

Use the URL inspection tool within Google Search Console to view a live version of your page and see if any resources are blocked.
